

I believe that it would be wrong to eliminate traffic and weather channels from the XM Satellite Radio Broadcasting. It is very useful to individuals like me and a lot of over the road truckdrivers and other professionals. I do not think that it is right that National Association of Broadcasters can pay off politician's to vote against the peoples right to hear broadcasts that can save them time or even their lives on our nations highways. Please reject the NAB'S PETITION 04-160 and support the right of XM Radio provider to provide the service that we have been receiving for the nominal charges we pay for their services. Thank you very much.
